DELIVERY SYSTEM FOR A STENTLESS VALVE BIOPROSTHESIS

ABSTRACT OF THE DISCLOSURE

The current invention discloses a catheter and a method for delivering a stentless bloprosthesis in a body channel, the method comprising percutaneously introducing a catheter into the body channel, wherein the catheter contains said stentless bloprosthesis at a retracted state; and disengaging said stentless bioprosthesis out of a distal opening of the catheter by a pulling mechanism associated with the catheter structure.
